

*****Multi Dose Packaging required for Camp*****

Campers attending Camp Thorpe this summer are required to bring their medications in dose packaging from the pharmacy. Campers who do not have their meds packaged this way will not be able to attend until they are dose-packaged. See some examples of what this might look like in the photos below.

We recommend you call your pharmacy right away to ask if they offer this service. If not you will need to find a pharmacy where you can obtain this service. Many of the larger pharmacy's such as CVS or Walmart Pharmacies offer this service.

There are also several online options such as Pill Pack by Amazon Pharmacy that can do these for you.

There are many pharmacies in Vermont that offer dose packing for longer periods of time that campers will be at camp. That's okay. You can use the remaining meds when campers get home from camp. Most of these services are for a month at a time so you may receive packaging for a longer length of time then your camper attends camp. You might find you really like receiving your meds dose packed!

Please get started on arranging this ASAP to avoid issues close to camp!
